EDUCATION

Gayatri Vidya Parishad College for Degree and PG Courses RUSHIKONDA VISAKHAPATNAM
Computer Science Engineering Bachelor of Technology (B.Tech) August 2023 - May 2027
CGPA: 7.42

EXPERIENCE

IIT Guwahati | Research Intern (Computer Science and Engineering) Guwahati, Assam, India |
May 2026 - July 2026

- Completed highly competitive summer internship in the Computer Science and Engineering department.
- Developing technical solutions and conducting research under the guidance of IIT faculty.

SKILLS

Programming Languages: C, HTML5, CSS3, JavaScript, ML, NLP
Libraries/Frameworks: JavaScript
Tools / Platforms: VS Code, Antigravity, Cursor
Databases: SQLite, Supabase, MongoDB

PROJECTS / OPEN-SOURCE

smart_student | Link *JavaScript, CSS, Python, HTML*
Built a Smart Student App integrating AI-powered features to assist students with academic queries, learning guidance, and efficient task management..

VISION-QUESTION-ANSWER-with-NLP—NN | Link *Python, JavaScript, HTML, CSS, FastAPI, React.js, Tailwind CSS, Google Gemini API, Groq API, NumPy Git & GitHub*
VisionIQ Developed a full-stack AI-powered Visual Question Answering (VQA) application using FastAPI and React, integrating Google Gemini and Llama Vision models for real-time image understanding and intelligent responses.

Medichronix-project | Link *HTML, Python, CSS*
Medichronix is a Flask-based web app for secure personal health record management, including profile management, medical document upload, health metric tracking, trend graphs, and a 24-hour trash recovery system.

IIT_GUWAHATI-SUMMER_INTERNSHIP | Link *Python, ML, NLP, LLM, Advanced DL*
The primary objective of this project is to implement and rigorously evaluate zero-shot detection methods for machine-generated text using statistical and log-rank-based techniques. The project focuses on the four benchmark datasets Reddit, SQuAD, Writing Prompts, and XSum and aims to determine how effectively detection methods can discriminate between human-authored and AI-generated text across these diverse domains without any task-specific training.

DetectLLM_Lens | Link *CSS, JavaScript, HTML*
DetectLLMLens is a tool used for detecting the Machine Generated Text and Human Generated Text with proper evaluation metrics like AUROC, Perturbations, Logrank, percentage of Misclassification, It can also train the datasets and predict the labels of misclassification (Whether the sentence in the dataset is AI generated or Human generated)

CERTIFICATIONS

- Certified in SQL Achievement - **Hackerrank**
- Certified for Completing DSA - **EXCELR**

- Certified for completing: Introduction to cloud computing - **IBM**
- Certified for completing: Introduction to AI&ML - Raspberry Pi foundation.
- Certified for completing: Introduction to IOT - **Curtin University**

HONORS & AWARDS

- Awarded and felicitated by the Hon'ble Governor of Assam at the National Youth Exchange Camp held at IIT Guwahati
